

Peter Allen

Peter's key skill sets:

- Wide water and sanitation sector experience (all aspects of the project life cycle)
- Extensive experience of legislation affecting service-delivery Departments and municipalities
- Extensive experience of working in a developing country context (South Africa)
- Good experience in water services infrastructure, master planning and policy requirements
- Extensive experience of local government work
- Extensive experience of institutional support work
- Direct experience, on a turn-key basis, of “quick-win” solutions for rural water supplies, including spring and borehole development

Peter Allen

Peter was registered with ECSA as a Professional Engineer in 1978.

From 1990 to 2015 he was managing director of a small engineering consulting company focusing on the local government and water sectors, often working as a sub-consultant to Wilson and Associates International.

Peter has nine years' experience of public-sector employment (ultimately as Chief Civil Engineer of a small government department), and twenty five years' experience in the water services sector.

He is a generalist, able to identify problem areas and required specialist solutions, and has a close understanding of the particular constraints and peculiarities of the public sector, particularly at local government/municipal level.

He has worked extensively in the public sector, as an employee and subsequently as an institutional support consultant.
